SUMMARY

Front-End Developer specializing in React.js, with hands-on experience building responsive and user-focused web applications. Skilled in JavaScript (ES6+), React, HTML5, CSS3, Tailwind CSS, and REST API integration. Experienced in translating Figma designs into functional, responsive interfaces and developing reusable UI components. Strong understanding of modern front-end development practices, responsive web design, Git/GitHub, and API-driven applications. Currently pursuing a B.Sc. in Computer Engineering and Intelligent Systems at Al-Aqsa University, with a strong interest in building scalable and reliable digital solutions

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer 2025 – Present

- Develop responsive web applications using **React.js, JavaScript, HTML5, CSS3, and Tailwind CSS**.
- Convert **Figma designs into functional and responsive web interfaces** with attention to layout accuracy and usability.
- Build reusable React components to improve code organization, maintainability, and development efficiency.
- Integrate **REST APIs** to retrieve, process, and display dynamic application data.
- Develop interactive interfaces including product browsing, search functionality, dashboards, and e-commerce features.
- Apply responsive design principles to deliver consistent user experiences across different screen sizes.
- Use **Git and GitHub** for version control and project collaboration.

Front-End Developer — CodeNest 2025 – 2026 | Gaza

- Developed responsive web dashboard interfaces using **HTML5, CSS3, and JavaScript**.
- Built and organized reusable front-end components with a focus on **usability, accessibility, and responsive design**.
- Implemented interactive user interface elements to improve user experience and application usability.
- Translated design requirements into functional web interfaces while maintaining consistent layouts and visual structure.
- Applied modern **responsive web design** practices to ensure compatibility across desktop and mobile screen sizes.
- Collaborated within a project-based development environment to implement front-end features and refine user interfaces.
- Used **Git/GitHub** for source code management and project version control.

EDUCATION

Bachelor of Science in Computer Engineering and Intelligent Systems 2023 – Present | Gaza Al-Aqsa University — Gaza, Palestine

SKILLS

Front-End Development

- React.js
- JavaScript (ES6+)
- HTML5
- CSS3
- Tailwind CSS
- Responsive Web Design
- DOM Manipulation
- Reusable UI Components
- REST API Integration

Development Tools

- Git
- GitHub
- VS Code
- Figma
- Vite

Programming

- JavaScript
- Python

Other Skills

- API Integration
- Front-End Performance Optimization
- UI Development
- Responsive Design
- Component-Based Development

LANGUAGES

- Arabic
- English

PROJECTS

Nabd — Offline Reporting Platform

Designed and developed an offline-first digital reporting system for creating and storing reports in low-connectivity environments. Developed the web-based admin dashboard for managing and monitoring submitted reports. Implemented data handling and API integration between the front-end and backend systems. Designed the system concept to allow reports to be transferred between devices until an internet connection becomes available. Focused on solving communication and data-reporting challenges in environments with unreliable internet connectivity. Technologies: React.js, React Native, Tailwind CSS, REST APIs, Backend APIs, Database Management **GitHub:** github.com/rubaqeshta04/alert-mesh 

Full Shop — E-Commerce Web Application

- Developed a responsive **e-commerce web application** with dynamic product browsing and product management features.
- Implemented **shopping cart and wishlist functionality** using reusable React components.
- Integrated **REST APIs** to fetch and display dynamic product data.
- Built responsive user interfaces using **React, Tailwind CSS, and JavaScript**.
- Applied component-based development practices to improve code organization and maintainability.
- Used **Vite** as the development and build tool.
- **Technologies:** React.js, JavaScript, Tailwind CSS, REST APIs, Vite

GitHub: github.com/rubaqeshta04/full-shop 

WordVision — Movie & Book Search Application

- Developed a responsive web application for searching and exploring **movies and books** using external REST APIs.
- Implemented dynamic data fetching and real-time search functionality.
- Created reusable interface elements for displaying search results and detailed information.
- Applied responsive design principles to provide a consistent experience across different devices.
- Implemented client-side **DOM manipulation** and API-based data rendering.
- **Technologies:** JavaScript, HTML5, Tailwind CSS, DOM Manipulation, REST APIs

Rana-Store — E-Commerce Website

Client Project | Front-End Developer

- Developed a responsive e-commerce website for a client using **HTML5, CSS, JavaScript, and Tailwind CSS**.
- Built responsive and user-friendly interfaces for different screen sizes.
- Implemented interactive front-end functionality using **JavaScript**.
- Integrated the front-end with the **backend** to handle and display dynamic application data.
- Translated client requirements into functional and visually consistent web interfaces.
- Focused on **responsive design, usability, and clean front-end development**.
- Used **Git/GitHub** for version control and deployed the project using **Vercel**.

Technologies: HTML5, CSS3, JavaScript, Tailwind CSS, Git, GitHub, Vercel

Live Demo: rana-store.vercel.app [↗](#) **GitHub:** github.com/rubaqeshta04/Rana-Store [↗](#)

REFERENCES

Front-End Developer [↗](#), *Rana-Store — Client Project*

02/2026 | Remote

- Developed a responsive e-commerce website using **HTML5, CSS3, JavaScript, and Tailwind CSS**.
- Integrated the front-end with **backend services and Supabase** to retrieve and display dynamic application data.
- Worked with API responses and data flow between the front-end and backend services.
- Troubleshoot integration issues related to data retrieval and front-end/backend communication, identifying and resolving issues through debugging and testing.
- Implemented interactive e-commerce functionality using JavaScript.
- Translated client requirements into functional and responsive web interfaces.
- Focused on responsive design, usability, and clean front-end development.
- Used **Git and GitHub** for version control and project collaboration.

Front-End Developer [↗](#), *CodeNest*

2025 – 2026 | Remote

- Developed responsive e-commerce dashboard interfaces as part of a team-based project.
- Built and organized dashboard pages for e-commerce management and data presentation.
- Developed interactive user interface components using HTML5, CSS3, and JavaScript.
- Implemented responsive layouts for different screen sizes.
- Organized front-end code and reusable interface elements.
- Collaborated with the development team to implement and refine front-end features.
- Used Git and GitHub for version control and project collaboration.
